

Competition Catalogue

Dear shooters and hunters,

It is with great pleasure that I personally introduce our new catalogue to you.

I hope you will find it comprehensive and easy to read. We are very proud of the growing interest in the Zoli brand and feel it is time to improve the quality of our communication. The objective is to enlighten the shooting and hunting fraternity about our company and the innovative products we are manufacturing.

We are very happy and feel rewarded that an ever growing number of people are using our guns with satisfaction and are achieving better results than ever before. This is a very encouraging trend and gives us an incentive to continue our work with enthusiasm and dedication. A commitment that presents difficult challenges but is well compensated by the satisfaction we get from the ever growing victories accomplished at national and international level by our loyal clients.

We firmly believe that innovation and tradition can and must co-exist and it is for this reason that our products, while technologically advanced still retain the universal principles of the most classical gun making traditions. As a result, Zoli's guns are highly evolved as far as materials and technology are concerned but offer a very classical,

highly refined design. In this catalogue we are very proud to introduce the latest generation of guns, researched and built on the basis of a simple philosophical concept: Quality must never be compromised or sacrificed.

The Z-Gun line is the embodiment of this concept. Besides an exquisite and modern look and it's well-tested longevity, the Z-Gun line hides an uncompromising technological approach that manages to combine the best ballistic performance with an incomparable low recoil sensation.

Shooters and hunters who have been using Zoli's guns for some time already appreciate the characteristics that make our products unique. Our success is also due to the generous and positive feedback offered by clients who, after using our guns feel the need to share their experiences.

Their endorsement and support has led to the strong growth of our brand, taking it to a new level within the top market segment. I hope you find this catalogue interesting and informative.

Thank you and warmest regards,

Paolo Zoli

The history of a family and their passion for fine guns!

Our modern history finds its roots in the historical and cultural context of the post-World War II period. Possessed with the creative entrepreneurial spirit that marks Italian people from the Brescia area, Antonio Zoli played an active part in the rebuilding stages following the war events that so disrupted the valley of the river Mella. Despite the incredible challenges posed by the times, Antonio did not hesitate to do all he needed to do to restart his company, taking the first steps for a business that would soon project his name, and now the Antonio Zoli brand, on the markets around the world.

Antonio Zoli was born to Giuseppe in 1905 in Magno, a small village (hamlet of Gardone Val Trompia) home to several famous gunsmithing families. Since the 14th Century, Magno had been a highly respected center of gun production, supplying arms to the governments of Venice, Piedmont and Naples. Its reputation was comparable to that of bigger towns like Marcheno and Lumezzane. From archival research, the Zoli family was already active in Magno in 1490, where they were involved with the local artisan scene. In the first decades of the 15th Century, the Zoli family was supplying the early arquebus makers, masters of rare craftsmanship, in the manufacturing of firearms. In the following centuries, the activity of the Zoli family consolidated even more, so much so that in the early 1800s Giovanni Zoli was working as a re-

nowned maker of best quality gunlocks. Proof of his activity is found in 1845 with an exquisite muzzle-loading pistol featuring the family logo, a symbol of the enterprising spirit and determination that the valley devel-

oped through the centuries. Reading through the history of the Zoli family is like reading through the history of Italian gunmaking in the Val Trompia region, famous the world over for fine gunmaking today. It is in this region that Antonio Zoli mastered the values and traditions that are still perceived as indissoluble today. Captivated by the appeal of the valley and possessing the strong passion for building guns and precision mechanisms inherited by his father, Antonio Zoli started his career during the war collaborating with and supplying the main gun companies in the area. But in October 1945, as soon as the war was over, he officially re-started his own business transforming it to one of the most relevant industrial activities in the area.

The company structure was further defined with the contribution of Gi-

useppe, Antonio's son, who provided further impulse in terms of product quality and market recognition. Giuseppe translated the classical parameters employed by master gunmakers for the production of best quality custom guns into bigger scale production of smooth bore side by side and over and under shotguns, with exposed hammers or hammerless. An example of Giuseppe's accomplishments is the "Delfino" over and under series with its Greener-type lock and excellent levels of quality for the time.

Always available to satisfy any market requests, Antonio Zoli developed an awareness for new trends since the very early years. In 1956, it was the first company in the world to build replicas of old muzzleloaders, marking the start of a new market that would become extremely important. Replica guns like the Zouave, the Harper's Ferry, the Mississippi, the Buffalo and the J.P. Murray as well as the Dragoon pistol are definitely worth mentioning and remembering. Among the main achievements, in the 1960s Antonio Zoli was also the first company in Italy to industrially manufacture shotgun rifle combination guns, breaking the monopoly held by gun makers in central Europe. A few years later, over-and-under and side-by-side double rifles were added to the catalogue. In 1980 the company started producing bolt action rifles, a production that reached thousands of units, both in the hunting and competition.

At the beginning of the 1990s, following the success achieved across all markets, Zoli decided to make a range of Drilling guns called MG-92. This step represented a new challenge, making Zoli compete with long-established, well-known manufacturers from Europe. The product launch was a blazing success, so much so that the production lasted for more than 20 years. Zoli Drilling (2 smooth bore barrels, one rifle) remains today the

only example of a similar gun ever to be industrially manufactured in Italy. At the end of the Millennium, under the new direction of Paolo Zoli, the company took on a great new engineering and design challenge in the over-and-under segment. The new project was called 'Classic Revolution 4' as it included four categories of over-and-under guns: competition and hunting smooth bore shotguns, double rifles and shotgun rifle combinations. Satisfying each of these categories perfectly with a state of the art design was challenging and required not only state of the art engineering, but reliance on the creative spirit and desire past down by many generations of Zoli family gunmakers. Thanks to this project, the company has today reached the objective of placing their products in the high-

est market segments. In fact, all four guns present technical characteristics belonging to top quality firearms, produced in limited quantities. The Zoli family is very proud of all the models in the Z-Gun series, from the Ambassador SL, to the EL, Z-Sport, Z-EXTRA or XL-EVO.

In recent years, the company has achieved amazing results in various shooting disciplines, winning national and international championships with a progression that clearly shows the extremely high ballistic and dynamic qualities featured on Zoli's guns. In

the wake of these triumphs, Zoli fully expanded and invested in the custom shop that has quickly become a key element in the new company strategy and is now able to satisfy even the most demanding customer requests. Since the beginning of the new Millennium, production methods, techniques and technologies have undergone a dramatic technological change. Thanks to constant investment Zoli today is one of the very few gunmakers that can take direct control of the entire manufacturing process, from planning and researching to finished product sale.

In 2013, motivated by successful levels of sales, Paolo Zoli decided to found Zoli International, a company subsidiary capable of importing, distributing and servicing every Zoli product on the US market. This was

another very important step in the history of the company that now had a strong foothold on the most important market in the world.

The incessant appreciation shown through the years by loyal customers is the best endorsement to Zoli's work, as well as their formal presence on markets all over the world. The feel for traditions of a family business, now in its third generation, has managed to adapt constantly to technological innovations without altering the love a craftsman feels for the products they manufacture.

Zoli Classic Revolution

“Classic Revolution” is the name of a challenging, rigorous and uncompromising project ZOLI embraced a few years ago. In this section you will learn about the most important technical features of all ZOLI over and under shotguns which have made this project extremely successful.

Through its “Classic Revolution” ZOLI has strengthened its presence in the market for high end guns with a better image and a stronger presence world over.

All Zoli guns are fitted with a hand detachable Zoli designed lock system. All Z-Guns series trigger assemblies have their critical parts Titanium Nitrate treated and the powerful main coil springs are coated with a self-lubricating material for maximum corrosion resistance and minimum wear.

Hammers, sears and trigger plates are precision CNC machined, specially hardened and ground. All trigger shoes are adjustable fore and aft. This complex assembly is then tested and hand fitted by expert gunsmiths.

Barrel soldering

Zoli was the first company in the world to develop an industrial process to silver solder shotgun and rifle barrels. This technique guarantees the most precise and durable joining of barrels compared to the more traditional approach which employs tin alloys. Further advantages include a more homogeneous assembly providing a drastic reduction of micro-vibrations contributing to reduced recoil when shooting and the ability of guaranteeing point of impact. Additionally a highly durable chemical blueing can be used to help retain the aesthetics of the gun for years. Today all Zoli barrels are made with this exclusive technique.

Forged Components

The action, trigger plate and monoblock form the foundation of the gun. Such components are all made using forged alloy steel. Amongst these components, the new solid action is the most important and innovative. Because the trigger plate mechanism is completely independent from the action, it does not sustain the stress and strain that could affect the adjustment of the firing mechanism. High adjustment standards are therefore guaranteed even under prolonged heavy use. The detachable trigger mechanism also facilitates easy maintenance. Each and every machined part is checked for correct dimensions.

Percussion system

Zoli's percussion system has been designed to the highest standards of safety that technology can offer. The firing pin is guided by a specially made bushing that ensures its perfect operation. The bushing is also provided with vent holes, to allow any gas produced by the accidental perforation of the cartridge primer to escape, without damage to the gun or injury to the user.

Barrels

Zoli have manufactured guns for more than 70 years and we commenced manufacturing our own barrels in-house more than 55 years ago. The ballistic performance of our barrels is legendary and the envy of all other shotgun manufacturers. Our extensive experience has always been underpinned by on-going research making it possible to ensure matchless ballistic performance with reduced recoil. Our years of intense ballistic and materials testing enables us to provide superior pattern distribution with higher energy yet softer recoil. Only Zoli barrels achieve this and we are willing to pit our barrels against any other makers barrels - any time.

Locking System

All of Zoli's guns are equipped with a particularly robust locking system consisting of a split locking bolt that mates accurately with the locking lugs of the mono block. The central position of the locking system in relation to the mono block axis ensures maximum tightness. Such a design requires the employment of spark erosion [EDM machining] techniques that allow extremely close tolerances. Even with extensive shooting, the joint between barrel and action is maintained over long periods due to the axis pins being positioned in the lower part of the barrel itself and the bottom lug engaging with the action body.

BHB System

Zoli's BHB Stock Grip and Barrel Weight system is the first real dynamic adjustment system that has been specifically developed for a shotgun. The ideal weight and balance point of a shotgun varies according to the shooter because of the individual's height, weight, strength, competence and

individualized mechanics. The Zoli BHB system addresses the issue of weight and its location helping create the optimum dynamics to achieve perfect control of the shotgun.

Therefore, even though the point of balance remains the same, the guns feel and dynamics can be altered to suit the individual shooter.

ZOLI

CUSTOM SHOP

Zoli Antonio has been building sporting firearms since 1945. Since we are passionate about what we do, we never stop researching and believe that innovation and traditions can or rather, must co-exist.

Our products are technologically advanced but we respect all the important gun making principles. Zoli's guns are revolutionary from a mechanical standpoint but classic in look and design. They reflect the principles of gun making that generated exquisite pieces in the past - real works of art that only skilled craftsmen could produce to be appreciated by a few discerning sportsmen.

Since 1980 the Zoli Custom Shop has built sporting firearms that range from the fine to the fantastic. Zoli custom firearms have been crafted for and with the input of the finest hunters and shooters. Our Masterworks line is geared toward the creation of products that are able to satisfy the most demanding tastes. All this is possible only by combining the latest technologies with refined finishes and great attention to detail, typical of the highest traditions in gun making.

Z-GUN RIBS & VERSIONS

FR

Flat rib

The Flat rib versions are supplied with a tapered top rib or parallel rib and in keeping with the classical tradition our ribs are fully chequered. Due to a wide choice of barrel lengths and stock configurations, we are able to satisfy any specific request. All our barrels are silver soldered thereby affording a softer more gradual recoil in spite of the superior ballistic performance. The method we use to make these barrels is the outcome of over 50 years of experience we have acquired making them in house. Barrels are supplied with interchangeable extended / flush chokes or with fixed chokes. The actions are available in a long lasting anti-corrosion silver or a traditional blued finish. Stocks are made from select Turkish walnut, finely chequered and oil finished. Flat rib barrels are available in 12, 20, 28 and 410 gauge. A 20 gauge gun can on demand be supplied with an extra set of barrels in 28ga or .410

Barrel lengths available 71 - 75 - 78 - 81cm. (86cm optional) // 28" - 29.5" - 31" - 32" (34" optional)

MR

Mid rib

The Mid Rib version is identifiable thanks to its medium height, fixed tapered rib - a small but very important detail that helps achieve a more relaxed neck position when shooting. Extra interchangeable barrel sets are also available on request. The actions are available in a long lasting anti-corrosion silver or a traditional blued finish. The standard stock is an adjustable Off-Set, designed perfectly for this rib style. The wood is select Turkish walnut, finely chequered and oil finished. The Z-Sport MR is available only in 12 gauge guns.

Barrels lengths available 75 - 78 - 81cm. // 29.5" - 31" - 32"

HR

High rib

Every aspect of the HR has been developed to achieve the highest level of performance in clay target shooting. The sense of comfort immediately perceived when using this style of gun is immediately apparent. The HR model naturally leads your eyes to the target, offering a perfect view that translates into a significant reduction of discomfort for neck and shoulder during long strings of firing. The lowered recoil sensation is due to the action being on a lower plane and also due to the Boss-type lock-up that moves the gun's central axis to a higher position. The HR is fitted with a newly introduced 11mm or 16mm adjustable tapered or parallel rib (only on 75cm - 29.5") that can be easily adjusted to change the point of impact 50/50 to 70/30. The barrels dynamic feel and silver soldering are one of Zoli's key elements that help deliver low recoil, minimal effort and less eye strain. Only Zoli barrels come with an impact point factory warranty. The standard stock is an off-set Monte Carlo, offering ideal pitch and a slightly rounded comb. This combined with an embossed pistol grip make for an extremely comfortable stock, ideal to make the most of the high rib style.

Barrel length available only 86cm - 34"

TRAP^{US}

The Z-Trap US model version is specifically made for the US Trap. Living up to the uniqueness offered by their barrels, known to provide a ballistic advantage, Zoli have designed Trap barrels providing them with a rib able to offer infinite adjustments in point of impact. Different from any other product offered in the market the Z-Trap US rib can be adjusted for height in the parallel position or tilted either upward or backward. These adjustments are made possible by the fact that the rib is not anchored to a fixed point. This is a very sophisticated engineering solution that provides, amongst other things, a system of recoil absorption built into the rib itself. The stock is an offset Monte Carlo style with the ideal pitch and a slight rollover comb. This combined with either a right or left hand palm swell makes this stock the most customisable standard stock of all high rib guns. Shooting the Z-Trap US is a unique experience as along with the ballistic superiority of the barrels the ergonomics of the rib and stock together make for a very relaxed and stress free shooting position leading to better scores.

Lead you to Victory

Ben Llewelin

Olympic Skeet UK shooter
Three times British Champion
World Cup silver medal
World Record holder

The Z-Sport model is the version ideally suited to competitive shooting sports. The engraving is clean and basic, decorated by an ornate border. The Z-Gun logo is in relief with a non-glare stippled top, on both the action sides and the underside. The barrels of the Z-Sport model are supplied with a tapered top rib, fully chequered in keeping with the classic tradition. Thanks to a choice of several barrel lengths and stock configurations the Z-Sport version will satisfy any specific request.

An extra set of interchangeable barrels is also available on request.

Action frames are available in a long lasting anti-corrosion silver or a traditional blued finish. Stocks are made of select Turkish walnut, finely chequered and oil finished. The Z-Sport model is available in 12 or 20 gauge. All 20 gauge models can be supplied with an extra set of barrels in 28ga or .410

Solid and Reliable

The Z-Extra has all the features of the Z-Sport with English style engraving mixed with some scroll. The Z-Gun logo, a gold inlay on both action sides and back pleasantly stands out against the antique silver of the base. This finishing combined with a durable protection ensures a high degree of corrosion resistance. The barrels of the Z-Extra are supplied with a tapered top rib, fully chequered in keeping with the classic tradition.

Thanks to a choice of several barrel lengths and stock configurations the Z-Extra will satisfy any specific request. An extra set of interchangeable barrels is also available on request.

Stocks are made of select Turkish walnut, finely chequered and oil finished. The Z-Extra is available in 12 or 20 gauge. All 20 gauge models can be supplied with an extra set of barrels in 28ga or .410

Beauty and Technique

Zoli spent two years developing a brand new ladies' shotgun, the highly-anticipated Z-Bella. Specially designed to meet the requirements of the female form, the gun is carefully embellished with eye-catching Swarovski crystals. The Z-Bella is attractively presented without sacrificing the technical nature of a product dedicated to competition. All stock dimensions have been specially adapted to the female form, including a slimmer pistol grip, altered drop, length of pull, pitch and cast. Additionally, each stock is equipped with an adjustable comb, for finer tuning the fit of the gun. Available in 12 gauge only the Z-Bella comes with a flat tapered rib with a choice of 28", 30" or 31" barrel lengths. Each Bella comes with five interchangeable flush or 3/4 inch extended chokes. On request the Z-Bella can be made with a mid-step or a high adjustable

rib in 30 inch barrel lengths. The Z-Bella is offered with either a silver or black action frame boasting elegant deep scroll engraving tastefully embellished with Swarovski crystals. The Z-Bella comes equipped with the BHB (Between Hands Balancer) in the pistol grip. This feature enables the user to customize and tune both the balance and swing dynamics of the shotgun. Swarovski crystals in the BHB system encircle the iconic Z a symbol of the prestigious Zoli Z-gun range. As with all Z-Guns, the Z-Bella is equipped with a Boss type locking bolt, monolithic frame, silver soldered barrels, a removable trigger mechanism with titanium coated components, self-lubricating springs and bushed firing pins.

Go beyond your limits

The newly launched Model XL-EVO now completes the already comprehensive Z-GUN range of competition guns. A difficult objective has been achieved considering that not only does XL-EVO retain all the fundamental aspects of Zoli's range of Competition guns but also reaches beyond by taking it to the next level. For this reason we consider the XL-EVO to be a gun dedicated to the expert shooter who requires a fully customizable gun. This gun is truly unique and stands above all in today's Competition gun market. Unlike the rest of Zoli's range the XL-EVO is fitted with an action which has been designed so that the weight of the action can be varied. This is a very novel idea, enabling the shooter to carry out this simple modification himself. The two side plates can be changed with others of different weights.

This innovation completely reflects the concept of 'Between Hands' introduced by Zoli. By altering only the weight located at the 'centre of gravity' of the gun, its dynamics can be changed without distorting it. When shooting at a professional level it is essential to have a gun that can be perfectly tuned and the XL-EVO has been developed to fulfil such a need with the variable weight of the 'VGC' action, the dynamic 'BHB' device and a stock with an adjustable comb. All XL-EVO's come with a monolithic action, a detachable trigger group with titanium nitrided components and self-lubricating springs. This model also has stainless steel bushed firing pins, a Boss-type locking system and silver soldered barrels. The XL-EVO is available only in 12 gauge with varying barrel lengths and four different rib configurations.

Invigorated by the incredible commercial success of the innovative range of XL-EVO models, at ZOLI we have decided to further enhance this line of products by dedicating three engravings to it. The result is the offering of three new versions, all designed and executed by our in-House Studio Zeta:

- The XL EVO Lux featuring an elegant and refined engraving in the purest English style. The Z logo is engraved on all three sides of the action.
- The XL EVO Firenze featuring deep relief engraving with acanthus leaves. The Z logo is engraved on all three sides of the action.

- The XLS Firenze with long side plates also featuring deep relief engraving with acanthus leaves next to a banner with the Antonio Zoli name engraved in it.

Like the other models in the XL Evo range, the XL Evo Lux and XL Evo Firenze come with a second set of heavy plates. The side plates can be swapped by the shooter to find the best weight and/or balance configuration.

The XLS Firenze model comes only with long side plates. Every gun is available in either a competition or field configuration.

This new line represents Antonio Zoli's reinterpretation of the timeless appeal of Color Case Hardening. Created using a complex heat treatment, this unique finishing has always been considered a classic feature of fine and traditional shotguns. The new Zoli VINTAGE is the perfect example of this association, fully respectful of traditions, but with the door open to the future and the improvements brought with it.

Starting from the very name, the VINTAGE line evokes an age of plenty, beauty and good taste, and becomes the tribute to our long and captivating history.

The journey to bring such beauty and class back from the past has brought about moments of great and rare surprise, uncovered emotions as powerful as the combinations of colors, with hues and accents of golds coming to life on each one of our creations. Each one is unique and no two are the same. Every gun in the Vintage line comes with a gold border hand cut by the world renown Master Engravers of Creative Art. The action bottom panel features the ZOLI Coat of Arms in gold. Only the model Z-Bella Vintage comes with the name "Bella" in gold on the bottom panel, and Swarovski Crystals on three sides. Every gun in the Vintage line is available in either a competition or field configuration.

Forged monolithic frame	Silver (Black available on Z-SPORT only)	Color case hardened
Calibers	12-20-28-410	
Trigger mechanism	Detachable with titanium coated components and self lubricants springs	-
Trigger system	Single selective trigger (Sporting version) Non selective trigger (Trap version)	-
Locking system	Boss style locking bolt	
BARRELS - 12ga.		
Length	71 - 75 - 78 - 81cm. (28"- 29,5"- 31" - 32")	86 cm. // 34"
Top Rib	Tapered 11-7mm in all lenght available Parallel 11-11 only on cm 71(28") - 75(29,5") - 81(32")	-
Top Rib Finishing	Laser	Hand made
Side Rib	Ventilated	Solid side ribs - No side ribs - BHB system
Soldering	Silver soldering Technology	-
Chokes	Interchangable extended chokes	Fixed chokes
BARRELS - 20, 28, 410ga.		
Length	75-81cm. (29,5" - 32")	-
Top Rib	Tapered 11-5mm - Parallel 11-11mm	-
Side Rib	Ventilated	BHB system
Soldering	Silver soldering Technology	-
Chokes	Interchangable flush chokes	-
STOCK (read more on page 66)		
Fixed Comb stock 12ga.	A, C, D	Adjustable - A/r, D/r, G/r, MR - Custom BHB system– Left version
Fixed Comb stock 20, 28, 410ga.	H	Adjustable – H/r - Custom BHB system- Left version
FOREND		
Forend type 12ga.	Rounded (Std on Sporting version) - Beavertail (Trap Std on Trap version)	Tulip shape - Custom
Forend type 20, 28, 410ga.	Rounded (Std on Sporting version)	Tulip shape - Custom

Z-SPORT MR // Z-EXTRA MR

ACTION	Standard configuration	Optional/extra charge
Forged monolithic frame	Silver (Black available on Z-SPORT only)	Color case hardened
Calibers	12ga	
Trigger mechanism	Detachable with titanium coated components and self lubricating springs	-
Trigger system	Single selective trigger (Sporting version)	-
Locking system	Non selective trigger (Trap version)	
BARRELS - 12ga.	Boss style locking bolt	
Length	75 - 78 - 81cm. (29,5"- 31" - 32")	-
Top Rib	Tapered 10-8mm	-
Top Rib Finishing	Laser	-
Side Rib	Ventilated	Solid side ribs BHB system
Soldering	Silver soldering Technology	-
Chokes	Interchangable extended chokes	-
STOCK (read more on page 66)		
Adjustable stock montecarlo off/set	MR	Custom stock, BHB system, Left version
FOREND
