

# FLEX

## THE PERFORMANCE YOU WANT, THE FREEDOM YOU NEED

The FLEX gives you the function and performance choices you want, adapting the camera to your exact needs and preferences, so when your season arrives you are ready to fill your tags.

### STUNNING PHOTOS AND VIDEO

The FLEX captures and transmits 33MP photos and 1080p videos with sound to the SPYPOINT app so you don't miss a thing. The new responsive trigger automatically configures the camera's settings to the exact conditions at the time of the photo to deliver the very best quality, every time.

### RELIABLE CONNECTIVITY VIRTUALLY ANYWHERE

The FLEX works on all major cellular networks and will automatically connect to the one with the best coverage in the area. No more worrying about carrier models or coverage maps. The new antenna has been designed to optimize the available cellular signal to deliver exceptional connectivity virtually anywhere you place your camera.

### SIMPLE SETUP AND MAINTENANCE

Getting the FLEX set up is easy and intuitive. Activation is done entirely in the SPYPOINT app, while on-camera buttons allow you to format the included 32GB MicroSD card, and take a test photo. You can leave the field confident in your trail camera's positioning, framing and network connectivity, and keep it running at peak performance by managing settings and updating your firmware from your home.

### CUSTOM SCOUTING OPTIONS

The FLEX is GPS enabled to maximize the functionality and accuracy of the customizable maps feature of the SPYPOINT app. The FLEX offers four capture modes: Photo, Video, Time-Lapse, and Time-Lapse+. The Time-Lapse+ function takes photos at your preferred interval and when the camera's detection sensor is triggered. No matter how you want to scout, the FLEX has you, and your hunting property, covered.

### ABOUT SPYPOINT

SPYPOINT, the world's #1 cellular trail camera brand, revolutionized the hunting industry by making mobile scouting accessible to all. Our reliable, easy-to-use cameras and innovative photo and camera management app with customizable maps, weather, and BUCK TRACKER AI filters, are designed with one goal in mind: to make you a more prepared and efficient hunter. With SPYPOINT you have the entire hunt in the palm of your hand.
