

## HX-Ti<sup>3</sup> - Lightweight. Durable. Ready for Anything.

The HX-Ti<sup>3</sup> represents the next generation of suppressor technology, developed for shooters and hunters who demand maximum durability, low weight, and uncompromising performance in any environment.

With a total length of just 184 mm, a 45 mm diameter, and an advanced over-barrel (telescopic) design, this suppressor delivers excellent balance and minimal added length to the rifle — making it equally suited for high-mobility hunting and precision shooting on the range.

Manufactured entirely from 100% titanium using state-of-the-art 3D printing, the HX-Ti<sup>3</sup> offers exceptional strength and a rugged, tactical appearance. Titanium construction ensures extreme resistance to wear, corrosion, and harsh conditions, while requiring virtually no maintenance over time.

Providing an impressive 30 dB noise reduction, this model is engineered to perform flawlessly whether in demanding field situations or during intensive training sessions.

The HX-Ti<sup>3</sup> is the perfect choice for those seeking a lightweight, robust, and future-ready suppressor — built to withstand anything, and designed to excel everywhere.
