

HX-Ti³ – LIGHTWEIGHT. DURABLE. READY FOR ANYTHING.

The HX-Ti³ is a next-generation suppressor developed for hunters and shooters who demand low weight, maximum strength, and reliable performance in any environment. Fully 3D-printed in 100% titanium, the HX-Ti³ offers extreme durability, a rugged tactical look, and outstanding resistance to wear and corrosion. The HX-Ti³ is the perfect choice for those seeking a lightweight, robust, and future-ready suppressor.

Built to withstand anything, and designed to excel everywhere.

HUNTING READY

Designed for demanding hunting environments where low weight, balance, and reliability matter most. Perfect for stalking and high-mobility hunts in all conditions.

PRECISION PERFORMANCE

Engineered for consistent accuracy and repeatable results. Ideal for both range training and real-world field use.

REDUCED RECOIL

Improves shooting comfort by minimizing recoil and muzzle movement. Faster follow-up shots with better control.

LIGHTWEIGHT TITANIUM

3D-printed from 100% titanium for maximum strength at minimal weight. Built for durability without adding unnecessary bulk.

HEARING PROTECTION

Provides up to 30 dB sound reduction for a safer and more comfortable shooting experience. Helps protect hearing during both hunting and training sessions.

MASTER THE POWER OF STILLNESS
