PRESIDIO 1-10x26
Fiber CRED10 SFP

Naming Specifics

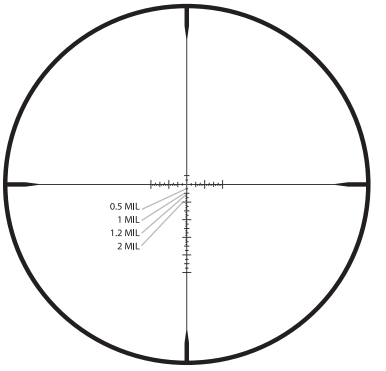

Family Name | Magnification | Objective Lens Size

PRESIDIO | 1-10 | x26

Fiber | CRED10 | SFP

Reticle Type | Reticle Style | Focal Plane

Reticle Information

Use Case - Short to Medium Range Shooters

- The Presidio 1-10x26 SFP LPVO is made for shooters who need to react quickly up close but still demand precision when the target is distant. This optic speaks to competitors, tactical professionals, and experienced civilians who train seriously and understand that adaptability is survival.
- For competitive shooters, the Presidio offers an advantage in dynamic matches where stage layouts demand speed, accuracy, and quick transitions. This optic is for people who spend weekends running drills, counting seconds, and shaving off tenths between shots. These shooters need something that tracks consistently, handles recoil, and stays zeroed even after hundreds of rounds and multiple magnification changes in a single day.
- For law enforcement and professional users, this optic is meant to bridge the gap between CQB and vehicle-length engagements. Its ruggedness and daylight-visible reticle make it dependable in unpredictable environments, where every detail and every second counts. It's also a fitting choice for military veterans who want professional-grade performance in their personal gear—something that feels familiar and trustworthy when they step onto the range.
- And for hunters and precision-minded outdoorsmen, the Presidio offers the freedom to track and engage moving game in thick brush or open terrain. The fast magnification change and clear sight picture make it suitable for real-world conditions such as fog, dust, fading light, and the constant movement that defines a hunt.

Advantages

- **CRED-10 Fiber SFP Reticle** - Features a crisp, daylight-bright 3 MOA dot illuminated by a hybrid fiber-wire and LED system. Provides superior brightness and clarity without excessive glare or reticle washout.
- **Wide 1-10x Magnification Range** - Enables rapid target engagement from point-blank to extended mid-range distances, making it ideal for both CQB and precision applications.
- **Second Focal Plane Reticle** - Maintains a consistent reticle size through the entire magnification range for fast reference and intuitive holdovers under stress.
- **Pop-Lock Turrets with True Zero Stop** - Low-profile, exposed turrets offer precise 1/10 MIL adjustments and lock securely to prevent accidental movement, ensuring dependable zero retention.
- **Aggressive Knurling and Toolless Throw Lever** - Enhances grip and allows lightning-fast magnification changes, even in wet or gloved conditions.

PRESIDIO 1-10x26 CRED10 RIFLESCOPE

SPECIFICATIONS & FEATURES

SPECIFICATIONS	Presidio 1-10x26 SM13144CRE
Reticle Type	CRED-10 Fiber SFP
Reticle	Fiber-Wire
Reticle Color	Red
Illuminated (Yes/No)	Yes
Illumination Type	Fiber
Reticle Brightness Settings	0-12 with OFF between every evel
Magnification (x)	1-10
Objective Lens Diameter (mm)	26
Tube Diameter (in/mm)	1.34 / 34
Field of View (Angular)	23° - 2.3°
Field of View (ft @100 yd/m @100m)	122.1 - 12.03 / 40.70 - 4.01
Eye Relief (in/mm)	3.94 - 3.74 / 100 - 95
Parallax Setting (yd/m)	10 - ∞ / 9 - ∞
MOA Adjustment (One Click =)	1/10 MIL
Adjustment Range W/E (MIL)	35
Windage & Elevation Lock (Yes/No)	Yes
Diopter Adjustment (+/-)	+2 / -2
Light Transmission (%)	89
Lens Coating	Fully Multi-Coated
Focal Plane	Second
Battery Type	CR2032
Battery Life (Hrs)	High: 350 Mid: 1000 Low: 1550
Body Material	Aluminum 6061
IP Standard (Water Rating)	IP67
Dimentions (in/mm)	10.5 x 3.6 x 2.4 / 267.5 x 90.5 x 61
Weight, No Mount (oz/g)	27.1 / 770

FEATURES

- Fibre-Wire illuminated reticle
- 10x magnification range
- Shock & Fog Proof, Nitrogen Purged
- IP67 Water Proof
- Fully Multi-Coated Lenses
- Battery life: 350 / 1550 hours
- Low Profile pop-locking turrets with Zero Stop
- Rated for 1200G's
